

August 8, 2014

United States Senate
Washington, DC 20510

Dear Senator:

The undersigned organizations support the *Medicare Advantage Participant Bill of Rights Act of 2014* (S. 2552), and we urge you to co-sponsor this legislation and help advance it through Congress. Passage of the legislation would benefit the nearly 16 million seniors and people with disabilities currently receiving their health care from Medicare Advantage (MA) plans as well as those who may enroll in MA in the future.

More and more frequently, MA plans are dropping doctors and other health care providers from their networks, often in the middle of the plan year. While MA plans are permitted to alter their provider networks at any time, beneficiaries and their providers often receive little advance notice about these changes. This can be especially problematic for beneficiaries who have a long-standing relationship with their doctors or who are in the midst of a serious illness and do not want to switch medical providers.

The *Medicare Advantage Participant Bill of Rights Act* aims to protect beneficiaries from losing their doctors in the middle of the plan year and to improve the transparency of MA plans. This legislation would:

- Prohibit MA plans from dropping providers, without cause, during the middle of the plan year;
- Require MA plans to finalize their provider networks for the subsequent plan year at least 60 days in advance of the annual enrollment period;
- Provide increased notice to beneficiaries and providers when MA plans change their provider networks;
- Increase transparency by requiring MA plans to publicly disclose the factors they use in designing their networks;
- Require the Centers for Medicare and Medicaid Services (CMS) to reevaluate its network adequacy evaluation process by consulting with relevant stakeholders, including providers, MA plans, and beneficiary groups; and
- Improve the information available for seniors to compare MA plans on the CMS Medicare Advantage Compare tools.

As consumer advocates representing millions of older adults and people with disabilities, we believe that beneficiaries enrolled in MA plans should not have to worry about losing their doctors suddenly. With respect to MA plans, we support additional consumer protections, such as those outlined in the *Medicare Advantage Participant Bill of Rights Act*, and hope that you will co-sponsor this important legislation.

Sincerely,

ACCSES
